

INTRODUCTION

First, I would like to thank you for giving me this opportunity to introduce myself.

Myself Zeba Kainat currently living in Noida and working as a Software Engineer in Tech Mahindra from around 2 year and 2 months since July,2019 and previously I worked at Nihilent Analytics Limited as Trainee Software Engineer for 5 months in Kolkata. I completed my graduation in Bachelor of Technology in Computer Science and Engineering from Seacom Engineering College, Howrah, West Bengal (under MAKAUT University) in 2019 with an aggregate of 8.6 CGPA and completed my Secondary and Higher Secondary from CBSE Board in Dhanbad which is my hometown with an aggregate percentage of 88 and 90.2 respectively.

My technical skills are Basic knowledge of computer, Good knowledge in java, mainframe, SQL, python, .NET.

Coming to my family background my father is a business person and mother is a housewife. I don't have any siblings.

My strengths are being hard-working, easy to adapt in any change or any kind of environment. I am a good team player.

My short-term goal is to get a job where I can enhance my knowledge and skill and become a singer also.

My long-term goal is to become a knowledgeable personality in the field of work in which I am assigned in the respected position of the company and expertise in that field.

My hobbies are listening to music's, reading novels, playing outdoor games (especially Basketball) and spending time with family and friends.

That was all about me.

Thank you for giving me this opportunity to introduce myself.

WHY I CHOOSE THIS COURSE?

Data Science is the study of data. It is about extracting, analyzing, visualizing, managing, and storing data to create insights. These insights help the companies to make powerful data-driven decisions. Data Science requires the usage of both unstructured and structured data. It is a multidisciplinary field that has its roots in statistics, math, and computer science.

I have chosen Data Scientist course based on the following reasons: -

1. First of all, I have keen interest in this field.
2. Data Science is greatly in demand.
3. There are numerous opportunities to work in different fields like, healthcare, banking, consultancy services, and e-commerce industries.
4. It helps in automation and make a smarter product for companies which lessen the repetitive work by training the machine.
5. It will provide me the great career and help me in personal growth. It will also change my problem-solving attitude.
